JOB TITLE

DATA ANALYST

CAREER SUMMARY

I am a dependable, devoted and result oriented individual with exceptional, analytical and problem-solving skills. I have experience in data analysis techniques such as data handling, analysis, visualization, modeling and predictive analysis with MySQL, Microsoft Excel, Microsoft Power BI and Python. I have handled a couple of projects including Card issuance analysis for Wema bank Lagos Zone and Business Intelligence Analysis for Excellent Fabrics Lekki, where I interpreted, analyzed and visualized data in order to show business intelligence insights needed to guide business decisions. Also, during my employment at Kyosk Digital collection, I Managed day-to-day sales activities including Used the company's **Order Management System (OMS)** to execute tasks for clients; collected and analyzed past clients' data to aid business decision making. Also worked at Bukkahut Restaurant Ikota, where I utilized the company's **Order Management System** called **POSIST** to track and manage orders and procurement and supervised the store activities.

TECHNICAL SKILLS

- Microsoft Power BI (Power Query, Visuals Builder)
- Microsoft Excel (Vlookup, Conditional Formatting, Pivot Tables)
- SQL (MySQL, SQL Server)
- Python for Data Analysis (Pandas, Pandas profiling, NumPy, Plotly, Matplotlib, Seaborn)
- **Additional skills:** Microsoft Office suites (MS Word, MS PowerPoint, MS Outlook)

PROJECTS

- **Sales Analysis for Excellent Fabrics Lekki**
 - Utilized **Microsoft Power BI** to analyze, interpret and visualize the company's sales using dashboard and gave recommendations for improved sales.
- **Card Issuance analysis for Wema Bank, Lagos State**
 - Used **Microsoft Excel** to analyze and interpret the dataset to give insights about carded and uncarded customers and clearly presented the inferences on a dashboard for better decision making.

➤ **Fraud Detection in Electricity and Gas Consumption**

- With the aid of **Python libraries** (Pandas, NumPy, Matplotlib, Plotly and Seaborn), I analyzed the data to show business intelligence insights needed to guide business decisions.
- Developed a Machine Learning algorithm to train, predict and test the model in order to know the best performing model applicable to the behavioral pattern of the clients in the future.

WORK EXPERIENCE

➤ **Kyosk Digital Services: April, 2022 – March, 2023**

Designation: Business Developer

- Used the company's **Order Management System (OMS)** to execute tasks for clients
- Collected and analyzed past **clients' data** in order to study business trends and make recommendation to the company based on customers' demands for the rapid growth of the company.

➤ **Bukkahut Restaurant Ikota (November 2021 – March, 2022)**

Designation: Store Supervisor

- Utilized the company's **Order Management System** called POSIST to track and manage orders and procurement activities.
- Supervised the activities of store and back of house activities including procurement and dispatch of items to appropriate departments for efficient and smooth running of day-to-day operations and Report to the outlet manager as required.

CERTIFICATIONS

➤ **TechQuest STEM Academy – April, 2023**

- Data Analytics Certification

➤ **Data Camp – February, 2023**

- Introduction to MySQL

➤ **National Youth Service Corps (NYSC) – November, 2021**

- NYSC discharge certification

EDUCATION

➤ **Federal University of Technology Owerri (FUTO) – 2020**

- Obtained B.Eng. in Electrical/Electronic Engineering.
